

Response to Historic England's feedback on Screening Report

We were pleased to get feedback from Historic England and as suggested by Sutton Council, we spoke to Mark Stevenson at Historic England on 27 March 2017.

- We discussed matters that were raised and were happy to remove the mention of bore holes from Policy EP9.
- We were pleased to add additional wording to our Policy CIP1: "Protect and where possible enhance the area's archaeological heritage and the potential for community engagement.
- A justification was added for this additional text and Mark's team kindly provided us with a map of the Wandle Gravels and Alluvium APAs, now known as 'Map 10'. "In particular, we expect to see the archaeology assets detailed in map 10 continue to receive protection and enhancement."
